

Traumatic Brain Injury Study

Have you experienced a traumatic brain injury?

Are you between the ages of 18 - 60?

If so, you may be eligible for a research study designed to understand how our brain helps us make decisions.

*Women who are pregnant cannot participate in this study.

Participation involves up to 7 out-patient visits for a total of less than 15 hours at the NIH Clinical Center in Bethesda, Maryland for screening, decision-making tests, brain imaging scans, and non-invasive brain stimulation.

*There is no cost for participation and participants will be compensated.

For further information, please contact Ethan Buch at (301) 402-3497 or ethan.buch@nih.gov

PLEASE REFER TO RESEARCH STUDY 14-N-0083 (WWW.CLINICALTRIALS.GOV)

ALL INQUIRIES ARE CONFIDENTIAL
